👤 Profile

Experienced web developer with a strong focus on front-end technologies. Excited to contribute skills and knowledge to impactful projects driving innovation and growth. Seeking opportunities to expand expertise and make a positive impact in the tech industry. Committed to advancing career in web development and programming through ongoing learning and professional development.

📁 Projects

Employee Management System 🔗

Developed a responsive web application using React.js and Vite for managing employee data. Implemented full CRUD operations (Create, Read, Update, Delete), with a clean UI for ease of use. Ensured maintainable code with ESLint Integration and modular component structure.

Tech Stack: React.js, Vite, JavaScript, HTML, CSS

Weather App 🔗

Created a responsive web app using JavaScript to display real-time weather data for any city. Integrated with a public weath API to show temperature, conditions, and daily highs/lows

Tech Stack: HTML, CSS, JavaScript

Encode-Decode CLI App 🔗

Created a command-line tool to encode and decode text using Base64 and Caesar cipher techniques. Demonstrates strong logic building and understanding of string manipulation and encryption basics in a terminal environment.

Tech Stack: Python
