PROJECTS

➤ To-Do List
Nov 2024 - Nov 2024
https://github.com/Priyank404/To-Do-List

Developed a JavaScript-focused to-do list application with an interactive interface, enabling users to efficiently add, manage, and track tasks.

➤ CURRENCY CONVERTER
Dec 2024 - Dec 2024
https://github.com/Priyank404/Currency-Converter

Developed a web-based currency converter using HTML, CSS, and JavaScript, featuring interactive UI elements and conversion functionality between different currencies.

➤ Weather Forecast
Dec 2024 - Dec 2024
https://github.com/Priyank404/weather-app

The Weather App is a JavaScript-based application that provides real-time weather updates for any location. It fetches weather data using an API and displays information such as temperature, humidity, wind speed, and weather conditions. The app features a clean, user-friendly interface and supports location-based searches by city name or ZIP code. It leverages HTML, CSS, and JavaScript for its functionality and design
